New Product

Linus Health

Transforming Brain Health
Assessment in Primary Care

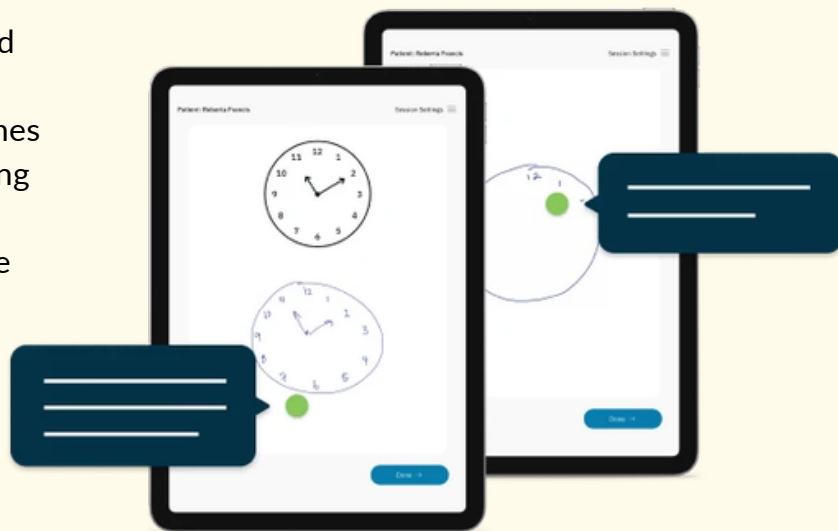

Linus Health is a digital brain health platform designed to help healthcare providers detect, monitor, and manage cognitive impairment earlier and more efficiently. Built for primary care and specialty practices, it combines validated assessments with AI-powered analytics to support clinical decision-making.

Why It Matters

- Cognitive impairment often goes undetected in early stages
- Early identification improves patient outcomes
- Standard assessments can be time-consuming and inconsistent
- Growing demand for dementia and cognitive screening

Key Features

- Digital cognitive assessments
- AI-powered analytics and risk insights
- Automated scoring and reporting
- Supports early detection of mild cognitive impairment (MCI)
- Easy integration into clinical workflow
- Designed for primary care, neurology, geriatrics & research
- Reduce screening time
- Improve documentation and reporting
